A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10 and 30, drawn to a radiation image processing apparatus and method that uses contour recognition to extract a feature amount, classified in class 382, subclass 132 (image analysis/X-ray film analysis).
 - II. Claims 11-23 and 31, drawn to a radiation image processing apparatus and method that uses signal variance extraction and pattern detection to extract a feature amount, classified in class 382, subclass 181 (image analysis/pattern recognition).
 - III. Claims 24-29 and 32, drawn to a radiation image processing apparatus and method that judges the correctness of a feature amount to specify a body part, classified in class 382, subclass 309 (image analysis/editing, error checking, or correction).
- 2. The inventions are distinct, each from the other because:
- 3. Inventions I, II, and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because claim 24, which is one of the broadest combination claims, does not require the use of contour recognition as required by claim 1, the broadest subcombination claim of Group I,

nor does it require the use of signal variance extraction as required by claim 11, the broadest subcombination claim of Group II. The subcombination of Group I has separate utility such as image segmentation based on the results of the contour extraction. The subcombination of Group II has separate utility such as feature recognition based on the results of the pattern detecting means.

- 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
- 5. A telephone call was made to Leonard Holtz (Reg. No. 22,974) on June 21, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
- 6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ryan J. Miller whose telephone number is (703) 306-4142. The examiner can normally be reached on M-F 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Leo H. Boudreau can be reached on (703) 305-4706. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
